

PHAN THUY DUONG (Class of 2020)

Rikkyo University had become my dream since I asked for the scholarship in Japan because of its beauty and history. And on the day, I have gone through the curve gate of the main building, I know that I can touch my dream. This is such a convenient and fancy university with great people. My Professor is nice and willing to help me once I have the questions. Staffs from MPMA have good looking and always feedback your request with their smile. I like the huge library best with fantastic corners that serve for all your needs from separation to gathering such as CD rooms, teamwork rooms, workshop space or even relax chairs for napping... Rikkyo is fabulous in all seasons of the year, especially in Sakura and Fall. I am sure that you can spend several hours on the campus and collect hundreds of photos.

This is not only an academic environment but the place where you enjoy your life.
