

# MUSUSU LINDA MWIMBA (Class of 2019)

There we were, all 3 of us, from Africa- JICA sponsored. Every bit as lost and scared walking through the gates of Rikkyo University as vivid and real as the picture on internet. An amazingly beautiful place, so immaculate and organized. Hardly had we concluded pondering where to go than a heartfelt lady walked towards us asking if we needed help. Right on! Surprisingly, that is how systematic the university system itself is. Everything from orientation, registration, facilities and class is that organized and planned. No surprises at all, course outlines, expectations and lectures are delivered as advertised. Warm, helpful and accommodating staff all the way, surrounded by staff to help and guide you through. My campus environment and life has been so motivating. It flows right into class and helps me network and learn from both colleagues and the institution. My student life has never been better with an astounding library linked to internet systems that would have one access more than they could ever read, that is Rikkyo University, an academic world of excellence.
