

ALVITA HALWANI WASISTIYANI SUBAGYO

(Class of 2022)

I have been living in Tokyo for several years before joining MPMA. Truthfully, I found several universities that piqued my interest but MPMA offered the best curriculums for my needs.

I could say this because not only MPMA's courses are interesting but also I could take courses from other major which are incredibly useful for me (someone from private sector).

In addition, Rikkyo's campuses are very beautiful and Muslim friendly. They provide prayer room and halal foods which I found these are very convenient and thoughtful.

They also offer a lot of interesting students activities that would suit your needs and interests.

Moreover, the faculty members are also very knowledgeable, helpful, and understanding.

In corona pandemic where learning platforms are change drastically, the lecturers are capable to adjust quickly and deliver great quality of education.

Rikkyo has great professors who bring out the best of their students which I think they are hard to find and impossible to forget.

Furthermore, the staff members are also very helpful, informative, and kind. I got tons of support from them during my studies. I think it is very crucial because we have other important matters outside study that we have to keep up and the staff members are always there to support.

In conclusion, if I had to choose again, I would still choose Rikkyo MPMA without a doubt.
